## EDUCATION

### Charleston Southern University

Charleston, SC

*B.Sc. in Computer Science, Minor in Pure Mathematics; UPE Honors, 4.0 GPA*

*Aug. 2024 – May 2027*

- Graduating early in May 2027 by leveraging dual enrollment course work and real analysis in my final semester.
- President of ACM club; cybersecurity team studies in Linux enumeration (WireShark, cron, logs, systemctl) and hardening (passwd, sysctl, ufw, SMB) in preparation for PCDC and SECCDC.

## EXPERIENCE

### Summer Games Intern

May 2026 – Aug. 2026

*Booz Allen Hamilton*

*Charleston, SC*

- Engineered full stack, multi-stakeholder, web app for accessing an automated claims processing AI agent.
- Debated tradeoffs to create technical alignment and identified the strongest decision maker for ongoing leadership.
- Programmed endpoints and DB schema for handling user documents in Spring Boot, Hibernate, and PostgreSQL.
- Implemented automatic document conversion using the Gutenberg PDF Docker container.
- Managed AWS infrastructure including EC2 instances, S3 for object persistence, and ECS for hosting.

### Ace Cyber R&D Intern

Dec. 2025 – May 2026

*NIWC Atlantic (via Cor4ce)*

*Charleston, SC*

- Researched and implemented automated data spillage prevention and retention policy enforcement tool.
- Built network testbed using MS Business Tenant with SharePoint and SMB via Samba in VM.
- Final script connects to testbed, reads multiple doc types, tags files with PII, and generates stale data report.
- Performed comprehensive benchmarking that formed the bulk of the results in presentation and 39-page report.

### AI Researcher

May 2026 – June 2026

*NSF Grant, Charleston Southern University*

*Charleston, SC*

- Coded and benchmarked two distinct AI-agents for UML extraction from images to determine optimal approach.
- Produced production-ready ETL pipeline for extraction from images and converting to ontology for reasoning.
- Built novel, object-oriented AI-agent observability framework in Python for fast review of reasoning and outputs.

### Computer Science Researcher

Jan. 2026 – May 2026

*Computer Science Dept., Charleston Southern University*

*Charleston, SC*

- Led a three-student pilot study into tracking student programming for anti-plagiarism using an editor plugin.
- Ran and saved production MongoDB database via Docker. Extended and republished existing VSCode extension.

## PROJECTS

### LLM News Website (Rapid prototyping) | Python, Bash, JavaScript

Mar. 2025 – Present

- Developed an AI-powered news website MVP in three days.
- Used Pexels API for image fetching and a social API for automatic daily syndication.
- Implemented Continuous Delivery (CI/CD) using GitHub and Vercel for agile deployment.

### Nonprofit Web Solutions (Design thinking) | WordPress, JavaScript, Accessibility

May 2022 – Present

- **The Gathering Place:** Redid Wix website in WordPress in 2023, achieving a 95% reduction in accessibility errors relative to the average Wix site. Maintenance is redeploying the database from backups after outages.
- **Charleston Dragon Robotics:** Designed and developed custom interactive WordPress site for robotics education nonprofit around the parent user journey in 2024.

### FTC Programming Lead (Leadership) | Java, Public Speaking

Jan. 2020 – May 2024

- **Documentation:** Won Think Award in 2024 for exemplary engineering portfolio design.
- **Programming:** Coded IMU and encoders and crafted PR on FTC knowledge wiki to democratize knowledge.

## TECHNICAL SKILLS

**Languages:** C++, Bash, Java, Python, Perl, PowerShell, PHP, JavaScript

**Data Science:** Beautiful Soup, R,  $\text{\LaTeX}$ , GNUPlot, Advanced Excel, Benchmarking Statistics, Regex, RAG

**Full Stack:** Spring Boot, Hibernate, PostgreSQL, MySQL, Docker, jQuery, React, EC2, ECS, ELB, NSG, RDS, S3

**Certifications:** Network+, Security+ (in progress)
